Miller Engineering's Extensive line of EL Experimenter's kits have been designed to bring your imagination and ideas to life!

Miller Engineering's extensive line of Electroluminescent (EL) lighting products will meet the many demands of modelers and experimenters alike. Our EL lamps are only .008 to .010 thick, just a little thicker than a sheet of paper. The light output is a soft neon-like glow with no "HOT" spots that are characteristic of other type of light sources. This coupled with their flexibility and near zero heat output, makes them the perfect choice for many lighting projects.

#2501 - Experimenter's Kit

Have an idea of your own? Then this is the perfect kit. This kit has everything that you need to bring your imagination to life. Our specially designed EL lamp is easy to cut with scissors or a sharp knife and may cut to produce up to 6 separated EL lamps. Detailed instruction book gives many ideas and methods for using EL lamps.

Perfect for creating your own signs, custom lighting for all your modeling needs.

Kit includes:

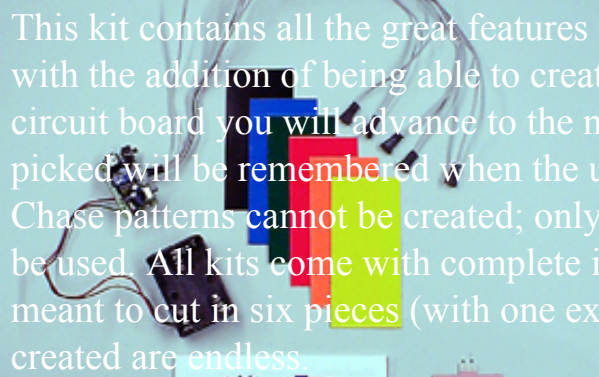

- One white EL lamp, size: 1.7"x 3.75"
- Makes from one to six EL lamps.
- One ready-to-run power supply that runs on 2 AAA batteries (not included).
- Assortment of color overlays.
- Complete instructions with tips and ideas on using EL lamps.

#2502 - Experimenter's Kit

Experimenter Kit

This kit contains all the great features of our non-animated Experimenter's with the addition of being able to create animation. Your power supply comes with a circuit board you will advance to the next chase pattern. The last chase pattern picked will be remembered when the unit is turned on again. Chase patterns cannot be created; only the 32 pre-programmed patterns can be used. All kits come with complete instructions. The EL lamp in the kit is meant to cut in six pieces (with one extra). The lighting effects that can be created are endless.

Kit includes:

- One white EL lamp, size: 1.7" x 3.75"
- One ready-to-run power supply that runs on 3 AAA batteries (not included).
- Assortment of color overlays.
- Complete instructions with tips and ideas on using EL lamps..

#2503 - Experimenter's Kits

Expand your imagination with EL wire. It's thin, flexible can be bent to almost any shape. Perfect for outlining models, R/C aircraft for night flying, ect. Each comes with 3' of one color EL wire, ready-to-run power supply that runs on 2 AAA batteries. Requires soldering to hook up wire to drive board.
