Feed is supplied via a GRE PSR-500 scanner using a Radio Shack version of the Scantenna ran through a 8 port Electroline EDA-2800 drop amp.

Software is ScannerCast

**PROBLEM WITH THE FEED???** Click on the **"Report a Problem"** button up top of page. Or enable Private Messages if you're going to report a feed problem report so I'm able to respond to you directly. Also, please try to include as much information as possible, like the browser or phone you're using, time of day, and if the problem is reproducible on multiple devices(two different computers, phones etc.).

**If you listen with Winamp you will see text tags. It will show scanning when scanner is scanning.**
