Virgo and Aries Compatibility: The Healer and the Hero

At first glance, there doesn't seem to be much [star sign compatibility](#) between Virgo and Aries. Two signs are very different in almost every way, but this love match can actually work surprisingly well. In astrology, compatibility is judged by more than just the sun sign, but Virgo and Aries compatibility does have possibilities.

Exactly because the signs are so different that Virgo and Aries will find one another intriguing. The relationship is likely to take a while to begin to simmer, because initially [modest](#), [Virgo is a little intimidated](#) by the full-on aura of Aries. However, Aries is attracted to the naivety and mystery that is Virgo, and Aries can be extremely persistent and persuasive – and eventually, love blossoms. And then what? How will Virgo and Aries compatibility manifest?

Well, Aries needs the stability, common sense and wisdom that Virgo has to offer and Virgo, much as they would hate to admit it, could really benefit from the excitement and daring that Aries can bring to an otherwise relatively quiet life. Because Virgo is not always particularly confident, the [Virgo partner brings out the protectiveness in Aries](#), softening the otherwise brash character of the ram. No helpless virgin, however, Virgo too has a lot to bring to the relationship, notably a willingness to look after, serve and gently guide Aries. For Aries and Virgo, compatibility is more natural than either would think, as they will discover as they get to know one another better.

A genuine friendship underpins this relationship when it's working well, with both signs having the other's best interests at heart. It's a sweet and romantic partnership – perhaps not as demonstrative, outwardly sexual or passionate as some others, but tender and loving in plenty of ways. Virgo and Aries compatibility blends the stability of earth with the go-getting ambition of fire, so there could be great potential here for achieving a satisfying standard of life which both partners can enjoy. It works on a practical level.

[Virgo, as a mutable sign](#), doesn't mind following Aries' lead and letting Aries ostensibly take

TAURUS COMPATIBILITY

charge, provided it's done with respect. In reality, however, Virgo is an equal partner in this relationship, and Aries will come to depend upon Virgo's soothing qualities when the rough and tumble of the Aries world becomes too hot to handle. When you have two signs with very different approaches to daily life, however, like Virgo and Aries, compatibility has to be worked at.

On an everyday basis, Aries likes to rush in and act, act, act, do, do, do – without too much thought. Virgo, on the other hand, calmly considers every option (three times) before making any decisions at all. There's clear potential for conflict here, particularly when it comes to things like family finances – for Aries and Virgo compatibility to work well, the two signs must compromise and agree how particular aspects of life should be handled.

Tell Your Friends:

[Astrological compatibility](#) of fire and earth is debatable; this element combination usually makes for great friends, but not necessarily much romance. With Aries and Virgo, however, we can see a great example of complementary personalities working together for mutual benefit.

In mythology, Virgo is the healer or the wise woman that the hero must surely encounter somewhere in his journey. In modern life, as in lore, Aries will benefit much from Virgo's wisdom and gentleness – if only the hero pauses long enough to listen. Meanwhile, Virgo's greatest wish is to be of service, and few need Virgo's help more than brave, bold but oh, so reckless Aries. Definitely an intriguing partnership, Virgo and Aries compatibility is one of those “what on earth do they see in each other?” pairings that works because of the couple's differences, not in spite of them.
