This is a torrent of almost every star trek ebook ever made through the end of 2006 and 15 ebooks from 2007. Everything up

through the end of 2006 is from a torrent onwhich is now down for who knows how long if not for good. The 2007

ebooks are mine. Unfortunately i don't have the name of the uploader and can't get it.

The missing books from this collection are:

- 1996 TNG Star Trek - First Contact (The Movie Novelization)
- 1997 TOS Starfleet Academy
- 1998 VOY Pathways
- 2000 Enterprise Logs

What follows is the list of books that ARE in the torrent. The 2007 ebooks are encrypted but all you need is the program

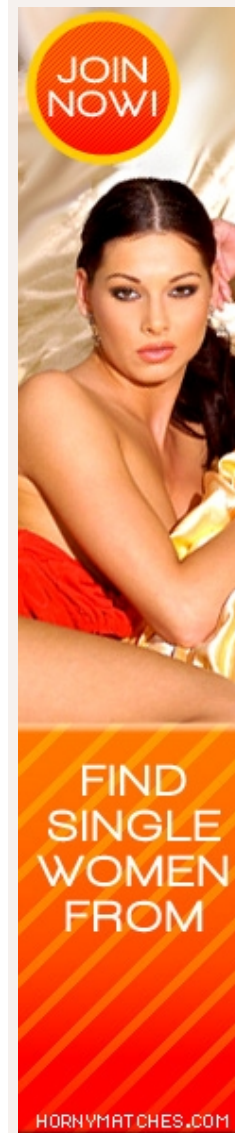

litconvert which is included in this torrent. An easy set of instructions are included in the README file and i found it easy to use it so i could change any .lit files including drm5 encrypted ones.

Enjoy and as always seed. I will until when/ifcomes back up and the other torrent is back.
