

Survival Tools

Below are numerous “tools” for download that can assist you in planning, preparation and tracking your survival & preparedness supplies.

These files all require additional software- such as MS Excel. If you do not have the necessary software – check out free [OpenOffice](#).

Spreadsheets:

[1 Week Food Storage Plan](#) – Spreadsheet allows automated calculation of needed food as well as other supplies based on number of people in group. Information is provided per food as to amount needed for 1 week.

[Food Storage Worksheet](#) – Quite a sophisticated Excel spreadsheet. Based on the food storage recommendations in the James Talmadge book – [Making the Best of Basics – Family Preparedness Handbook](#).

[Home Survival Worksheet](#) – Spreadsheet is based on a “Bug Out” philosophy and plan. Offers calorie calculations based on group members as well as many categories of supplies. Spreadsheet also includes idea’s on things like “Responsibilities” and “Documents”.

[Mormon 1 Year Food Storage](#) – Simple spreadsheet displays minimum food to store per person – categorized by gender & age.

[Provisions](#) - Master list of “provisions” needed for group in spreadsheet format.

[Shopping List](#) – A pretty decent spreadsheet that lists suggested items in several ways – with suggested qty’s needed and spaces to place current inventory levels.

[SHTF List](#) – Massive list of items to have after TSHTF. Very long and very impressive.

[The Ultimate Food Storage Worksheet](#) – Appears to be very similar to the [Food Storage Worksheet](#)- larger file size – very nice.
